

Who we are

Operational AI governance for small and mid-size organizations and public bodies, from impact assessment review to day-to-day oversight. Available for direct engagements, subcontracting, and teaming.

Services

- i* **AI governance setup**
Use case intake, an AI inventory, and policies sized to your organization.
- ii* **Impact assessment review**
Review draft AI impact assessments, find the gaps, and coach teams to an approval-ready version with a clear record of what changed.
- iii* **Compliance and documentation**
Records that hold up when someone asks later, including vendor and third-party AI due diligence.
- iv* **Project management**
AI rollouts and compliance projects planned, coordinated, and delivered.
- v* **Team enablement**
Working sessions so your people use AI well and know when to bring a human in.

WAYS TO START

Impact assessment review **PER ASSESSMENT**

Expert review of draft AI impact assessments, with coaching to approval-ready.

AI governance gap assessment **2 TO 3 WEEKS**

Practices compared to NIST AI RMF, ISO 42001, or M-25-21, with a prioritized fix list.

AI Readiness Assessment **6 WEEKS**

Where AI is in use, what needs attention first, and a governance plan your team can run.

Background

- 17 years in healthcare, including VA healthcare records coordination for a radiology practice
- Reviewed HIPAA and PCI-DSS compliance documentation as a cybersecurity consultant
- Designed an AI governance control framework of more than 50 controls mapped to the NIST AI RMF, ISO 42001, the EU AI Act, and GDPR

Public sector

State and local

AI use policies and staff training for public bodies, aligned to the NIST AI RMF and New Mexico's generative AI guidelines.

Federal

OMB M-25-21 support: use case inventories, high-impact determinations, impact assessments, and ongoing operations.

Primes and consulting firms

Subject matter expertise as a subcontractor or teaming partner.

Differentiators

Regulated-industry depth. 17 years of healthcare compliance and documentation work

Principal-led. The person who scopes your work leads it, with specialists added as needed

Framework fluency. NIST AI RMF, ISO 42001, EU AI Act, OMB M-25-21

Woman-owned small business. Owned by an Air Force veteran
