

Turning AI ambition into trusted outcomes.

Jasta Alliance provides practical AI governance, risk, and assurance support to government organizations and the partners that serve them. We help teams make informed, defensible decisions through governance assessments, use-case reviews, vendor and acquisition governance, and evidence-based assurance.

CORE COMPETENCIES

AI Governance Assessments & Roadmaps

Assess current governance practices, identify gaps in ownership, controls, oversight, evidence, and monitoring, and develop a prioritized roadmap.

AI Use-Case Governance & Assurance Reviews

Evaluate proposed or existing AI use cases for intended use, risk, human oversight, available evidence, controls, monitoring, and unresolved governance questions.

AI Vendor & Acquisition Governance Reviews

Assess vendor evidence, data practices, performance claims, human controls, monitoring, model changes, dependency, and acquisition-related governance risks.

Prime Contractor Support

Defined governance work packages, governance workstreams, embedded SME support, teaming, and subcontract support within broader public-sector AI, data, technology, and modernization programs.

WHAT DIFFERENTIATES JASTA ALLIANCE

Practical governance built for real-world decisions

Actionable, right-sized guidance that fits mission, risk, and operational realities.

Regulated-environment depth

Deep experience across complex, high-stakes environments, including healthcare and other regulated sectors.

AI-forward, human-accountable delivery

Uses AI-assisted workflows to accelerate research, evidence analysis, documentation, and quality review where contract, security, and data rules allow. Human judgment remains accountable for conclusions, recommendations, and final deliverables.

Flexible work package and SME support

Scalable support from focused work packages to embedded subject matter experts, tailored to agency needs.
